

Titan II LF

by Glaval Bus

Helping To Make Life Easier, One Stop At A Time

Whether it's a wheelchair passenger, business traveler or an elderly rider, the Titan II LF completely eliminates the need for steps to enter or exit the vehicle. There is also no longer a need for the traditional wheelchair lift. The Titan II LF is offered with either a Braun or Ricon bi-fold power ramp. This new low floor kneeling bus utilizes the rugged Chevy G4500 Gas chassis platform along with a heavy duty "Purpose-Built" floor structure designed and produced by Spartan Chassis. One of the most impressive features of the Titan II LF is the 4-corner, self-leveling air-ride suspension with kneeling capability. With the touch of one switch, the complete unit will kneel to achieve a 1:6 ramp slope which exceeds ADA's current minimum, at the same time providing a level floor surface for all wheelchair positions. The Titan II LF offers true random access' for up to 5 wheelchair positions or can seat up to 21 ambulatory passengers. With Glaval's solid reputation for building a quality product, the Titan II LF is sure to help make life easier!

Unit shown with optional features
